IOP Referral

Date:

Individual requesting Services:

Demographics (Name as it appears on Insurance card)

First:	Last:	M:
DOB	SSN:	Gender:
Race (optional):	Medicare#:	Maine care #
	Primary Ins Group#:	Primary Ins Group#:

Current Residence:

Street:			
Town:	State:	Zip:	Phone:

ICD-10 DX:	ICD-10 DX:	ICD-10 DX:
------------	------------	------------

Must have an ASAM Criteria of 2.5 or Higher

ASAM Score: _____

Signature of Clinical Individual giving the Score: _____

Additional Comments:

Please fill out attached ASAM Criteria (must be accompanied with the referral in order to schedule initial meeting)

ASAM PPC-2 (Circle that which applies)

Dim 1:	<u>LEVEL I</u>	<u>LEVEL II.1</u>	<u>LEVEL III</u>
Withdrawal symptom Potential	No Risk (OP)	Minimum (IOP)	High Risk (IP)
Dim 2: Biomedical Symptoms Complications	None to stable (OP)		
	Stable and Non interfering, may be under current care (OP)		
	If severe or unstable refer to medical for evaluation or treatment (IP)		
Dim 3: Emotional / Behavioral Conditions / Complications	Very stable, conditions are either a result of substance abuse or are are being concurrently treated by MH professional (OP)		
	Mild to non-interfering, has diagnosis of substance disorder (IOP)		
	Moderate requiring monitoring or interfering with recovery in less restrictive environment, has substance dependency diagnosis (IP)		
Dim: 4 Readiness to Change	Amenable to treatment and willing to participate (OP) Requires motivational strategies if not fully motivated		
	Able to acknowledge problem but requires monitoring but not 24 hour supervision. Resistance is high enough to require structure or repetition (IOP)		
	Resistance so high despite negative consequences that residential treating is required (IP)		
Dim 5: Relapse Potential Continued problem potential	Able to maintain abstinence while in treatment (OP) Can pursue recovery goals with minimal support		
	Struggling with addiction symptoms despite active participation at less intensive level of care (IOP)		
	High likelihood to not maintain abstinence despite active participation in less intensive care (IP)		
Dim 6: Recovery / Living Environment	Client can cope with environment and work on treatment goals (OP)		
	Client can cope with structure and support, but environment at at least partly unsupportive (IOP)		
	Environment dangerous for recovery necessitating removal from the environment (IP)
